SUMMARY

Full-stack TypeScript engineer — Angular on the front end, Node and GraphQL on the back, plus Rails where it fits. Seven years building Symplia's healthcare platform from an empty repo to production — now driving 4,200+ patient sign-ups across 45 states — alongside consulting across health-tech, government, and B2B SaaS. I care about clean architecture, automated quality gates, and shipping fast without breaking trust.

EXPERIENCE

Founding Engineer / Lead Full-Stack Engineer **Symplia, Inc**

Feb 2019 – Present · Part-time · Remote

- Architected and delivered a healthcare platform from an empty repo to production, owning the entire frontend.
- Built Angular Practice & Patient PWAs (plus the marketing site) driving 4,200+ self-service patient sign-ups across 45 states and 260+ active practice staff.
- Established CI/CD and quality gates on unit and Playwright integration tests — with automated QA running the Playwright suite both mocked (no backend) and live — for a safe, low-regression release cadence.
- Designed the shared NgRx state architecture powering both PWAs — a typed GraphQL client against a Rails API with Auth0 single sign-on.
- Keep the platform reliably online under real patient and practice load — near-zero major downtime and zero unhandled fatal errors across both apps last quarter (Sentry) — run solo and part-time.

Angular · TypeScript · NgRx · Rails · GraphQL · PostgreSQL · Playwright

Senior Full-Stack Engineer **Consultant / Self-Employed**

Feb 2019 – Present · Contract · Remote

- Confidential government client — air-gapped, on-prem generative-AI chat platform in Angular (Gemini-style) with real-time streaming, MCP tool integrations, and usage analytics.
- Symetra (Fortune 500 insurance) — Figma-style email-template studio with live in-canvas rendering and campaign analytics; owned product, UX, and frontend.

Angular · TypeScript · Rails · SSE Streaming · MCP

Lead Full-Stack Engineer · Consultant **Hexa Containment**

Apr 2022 – Nov 2025 · Contract · Remote

- Architected a Rails + Angular shipment & order-management platform that automated \$1M+ in annual inventory operations.
- Launched a customer self-serve portal replacing manual phone ordering — \$100K+ in online transactions — plus a loyalty feature generating \$15K+ in repeat business.
- Built an AWS email-parsing pipeline that ingests order emails and auto-generates shipping options, and directed development of a Next.js closed B2B marketplace.

Rails · Angular · Next.js · AWS · PostgreSQL

Senior Full-Stack Engineer Otus

Sep 2021 – Feb 2022 · Remote

- Led the migration of Login, Sign-up, and User-Management modules to a micro-frontend architecture for independent deploys and easier scaling.

Angular · Micro-frontends · TypeScript · Jest

Lead Software Engineer Airvel

Feb 2019 – Oct 2019 · Remote

- Built the Airvel B2B marketplace and flight-management site full-stack — Angular front end, Node.js + Apollo Federation GraphQL API, and Stripe Card + ACH payments (\$50K–\$150K).

Angular · Node.js · Apollo GraphQL · Stripe · GCP

Front End Developer axialHealthcare

Aug 2018 – Jan 2019 · Remote

- Built clinician-facing Angular features supporting opioid-addiction case management.

Angular · TypeScript · RxJS

Lead Frontend Engineer Metova, Inc.

2015 – 2018 · Franklin, TN

- Led an 8-engineer team re-architecting the SiriusXM web player (AngularJS → Angular) for live audio & video streaming.
- Raised code coverage from 0% to 80% (Jasmine / Karma), cutting sprint bug rates from ~70% to under 20%.
- Grew from full-stack intern to team lead over three years; earlier shipped a Ruby on Rails e-reader platform.
